

BUCK DINING TABLE - 120" x 42"

The Buck Dining Table interprets the simple functionality of the sawbuck (an ancient x shaped support for cutting logs) into a handsome and modern dining table that showcases our mastery of proportion, joinery and carefully selected and finished hardwoods. The Bucks details include a wedged, tusk tenon to connect the legs and stretcher and breadboarded ends on the solid wood top. These details are both beautiful and functional, the wedges exert pressure to keep the based sturdy and the breadboards allow for a thin top that will never warp. The Buck is available in multiple sizes with options to customize to meet the tailored needs of your space.
